

Summer Term 2021

<p>Science – Plants / Animals inc humans</p> <p>You will learn the names of different parts of plants, and the jobs they do. You will work scientifically to investigate what plants need to grow well. You will work in a hands-on way to identify the parts of a flower and will explore the different stages of the life cycle of a flowering plant. After half term, you will build on your knowledge that plants and animals obtain food in different ways. You will explore the different nutrients for animals including humans. You will identify the different types and main bones of skeletons and learn how a skeleton protects, supports, and helps the body to move.</p> 	<p>Geography – Climate Change</p> <p>You will be learning about what climate change is and the impact humans are having on the world. You will learn about deforestation, global warming, plastic pollution and your carbon footprint, as well as understanding ways to reduce these things. You will also be taking part in 'Earth Week' and celebrating Earth Day 2021, demonstrating support for environmental protection.</p> 
<p>Religious Education - How and why do believers show their commitments during the journey of life? Gospel/Kingdom of God</p> <p>You will be thinking about your own responsibilities and commitments thinking about how these responsibilities and commitments change as you grow older. You will be looking at how Christians show commitment to God as well as how other faiths demonstrate commitment.</p>	<p>Physical Education – Social skills/Ball skills/Rounders</p> <p>You will build on your cooperation skills, giving and receiving helpful feedback to improve the performance of yourself and others. In ball skills you will be learning how to pass, dribble and throw a ball. You will be working on your striking and fielding skills and playing mini games of rounders.</p>
<p>Computing – Email/Branching databases</p> <p>You will be learning how to open and respond to an email using an address book, how to use email safely and how to add an attachment to an email. After half term, you will be learning how to create branching databases to sort objects using just 'yes' or 'no' questions.</p> <p>French</p> <p>You will continue learning lots of French vocabulary. You will learn how to construct sentences in French and engage in conversations about the weather.</p> 	<p>Design and Technology – Wind Turbines</p> <p>Linking to your Geography topic, you will be thinking about renewable energy, in particular wind power, in order to design and create a wind turbine.</p> <p>Art –3D Sculpture</p> <p>You will be exploring the work of some famous sculptors, such as, Antony Gormley and Michelle Reader and replicating their work to create your own 3D wire sculpture.</p>
<p>Music</p> <p>You will be learning about how music brings people together. You will be looking at the topics of friendship, peace, hope and unity. You will analyse how music creates emotion and relationships. You will build on your knowledge and understanding about the interrelated dimensions of music and work together to devise your own music.</p> <p>You will also be learning various songs in preparation for this year's Key Stage 2 play!</p> 	<p>PSHE – Say no to bullying/ SRE/ Healthy Week</p> <p>You will further your understanding of what bullying is and how to help yourself or others who are being bullied. Later in the term, you will be having Sex and Relationship Education lessons at an appropriate level. You will also take part in our annual healthy week, where you will be learning about what makes a healthy diet and how you can increase your fitness.</p>
